

"The poetry of logical ideas"

Vision:

At Oatlands Junior, the high-quality mathematics Curriculum provides children with a foundation for understanding the world; the ability to reason mathematically; an appreciation of the beauty and power of mathematics, and a sense of enjoyment and curiosity about the subject.

OJS Curriculum Threads

Our curriculum vision is based upon our knowledge of our pupils and community. Our three curriculum threads are:

- Promote Equality and Diversity
- Provoke Curiosity
- Embed Safe Behaviours

These threads are woven through each subject, alongside individual subject pedagogy, to ensure our learners benefit from a purposeful curriculum.

National Curriculum Aims

The national curriculum for mathematics aims to ensure that all pubils:

- become fluent in the fundamentals of mathematics, including through varied and frequent practice with increasingly complex problems over time, so that pupils develop conceptual understanding and the ability to recall and apply knowledge rapidly and accurately.
- reason mathematically by following a line of enquiry, conjecturing relationships, and generalisations, and developing an argument, justification or proof using mathematical language
- can solve problems by applying their mathematics to a variety of routine and non-routine problems with increasing sophistication, including breaking down problems into a series of simpler steps and persevering in seeking solutions

Planning and Resources

At OJS, we follow the National Curriculum as a foundation for our mathematics planning. We then bespoke our planning by using a mixture of NCETM and White Rose support documentations. Our close links with Oatlands Infants School and our local secondary schools ensure that our mathematics curriculum is both fluid and progressive.

Wider Offer

In mathematics, our wider offer within the school day is: Complete Maths Tutor, TTRS, Numbots, Sport Numeracy and pre-teaching. We celebrate mathematics through weekly TTRS winners, Achievement Awards, Mathematician of the Month, as well as celebrating national events such as NSPCC Number Day.

"The poetry of logical ideas"

involving these ideas.

Number: Addition and Subtraction

- add and subtract numbers mentally, including:
- a three-digit number and ones
- a three-digit number and tens
- a three-digit number and hundreds
- add and subtract numbers with up to three digits, using formal written methods of columnar addition and subtraction
- estimate the answer to a calculation and use inverse operations to check answers

- statements for multiplication and division using the multiplication tables that they know, including for two-digit numbers of times one-digit numbers, using mental and progressing to formal written methods
- solve problems, including missing number problems, involving multiplication and division, including positive integer scaling problems and correspondence problems in which n objects are connected to m objects

with small denominators

- add and subtract fractions with the same denominator within one whole [for example, 7 5 + 7 1 = 7 6]
- compare and order unit fractions, and fractions with the same denominators
- solve problems that involve all the above.

Measurement: Length & Perimeter

measure the perimeter of simple
 2-D shapes

"The poetry of logical ideas"

- find 1000 more or less than a given number
- count backwards through zero to include negative numbers
- recognise the place value of each digit in a four-digit number (thousands, hundreds, tens, and ones)
- order and compare numbers beyond 1000
- identify, represent, and estimate numbers using different representations
- round any number to the nearest 10, 100 or 1000 solve number and practical problems that involve all the above and with increasingly large positive numbers

- tables up to 12 × 12
- use place value, known and derived facts to multiply and divide mentally, including multiplying by 0 and 1; dividing by 1; multiplying together three numbers
- recognise and use factor pairs and commutativity in mental calculations
- multiply two-digit and three-digit numbers by a onedigit number using formal written layout
- solve problems involving multiplying and adding, including using the distributive law to multiply two-digit numbers by one digit, integer scaling

- count and down in hundredths; recognise that hundredths arise when dividing an object by one hundred and dividing tenths by ten.
- solve problems
 involving
 increasingly harder
 fractions to
 calculate quantities,
 and fractions to
 divide quantities,
 including non-unit
 fractions where the
 answer is a whole
 number
- add and subtract fractions with the same denominator
- recognise and write decimal equivalents of any number of tenths or hundredths
- recognise and write decimal equivalents to 4 I, 2 I, 4 3

- compare numbers with the same number of decimal places up to two decimal places
- solve simple measure and money problems involving fractions and decimals to two decimal places.

Measurement: Correspondence and Scaling problems

- Convert between different units of measure [for example, kilometer to meter, hour to minute]
- measure and calculate the perimeter of a rectilinear figure (including squares) in centimeters and meters
- find the area of rectilinear shapes

- describe
 movements
 between positions
 as translations of a
 given unit to the
 left/right and
 up/down
- plot specified points and draw sides to complete a given polygon

Geometry - Shape

- compare and classify geometric shapes, including quadrilaterals and triangles, based on their properties and sizes
- identify acute and obtuse angles and compare and order angles up to two right angles by size
- identify lines of symmetry in 2-D shapes presented in different orientations

- subtraction twostep problems in contexts, deciding which operations and methods to use and why.
- solve problems involving multiplying and adding, including using the distributive law to multiply two-digit numbers by one digit, integer scaling problems and harder correspondence problems such as n objects are connected to m objects.

Measurement: Time

- read, write, and convert time between analogue and digital 12- and 24-hour clocks
- solve problems involving

RED KITE

"The poetry of logical ideas"

 read Roman numerals to 100 (I to C) and know that over time, the numeral system changed to include the concept of zero and place value.

Number: Addition and Subtraction

- add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate
- estimate and use inverse operations to check answers to a calculation solve addition and subtraction twostep problems in contexts, deciding which operations and methods to use and why.

problems and harder correspondence problems such as n objects are connected to m objects.

Measures: Statistics

- interpret and present discrete and continuous data using appropriate graphical methods, including bar charts and time graphs.
- solve comparison, sum and difference problems using information presented in bar charts, pictograms, tables, and other graphs.

Key Vocabulary

 From OJS key vocabulary for subject. find the effect of dividing a one- or two-digit number by 10 and 100, identifying the value of the digits in the answer as ones, tenths, and hundredths

- count forwards or backwards in steps of powers of 10 for any given number up to 1 000 000
- interpret negative numbers in context, count forwards and backwards with positive and negative whole numbers, including through zero
- round any number up to 1 000 000 to the nearest 10, 100, 1000, 10 000 and 100 000
- solve number problems and practical problems that involve all the above
- read Roman numerals to 1000 (M) and recognise years written in Roman numerals.

- common factors of two numbers
- know and use the vocabulary of prime numbers, prime factors, and composite (nonprime) numbers establish whether a number up to 100 is prime and recall prime numbers up to 19 multiply numbers up to 4 digits by a one- or two-digit number using a formal written method. including long multiplication for two-digit numbers multiply and divide
- multiply and divide numbers mentally drawing upon known facts
- divide numbers up to 4 digits by a one-digit number using the formal written method of short division and

- fractions of a given fraction, represented visually, including tenths and hundredths
- recognise mixed numbers and improper fractions and convert from one form to the other and write mathematical statements > 1 as a mixed number [for example, 5 2 + 5 4 = 5 6 = 1 5 1]
- add and subtract fractions with the same denominator and denominators that are multiples of the same number
- multiply proper fractions and mixed numbers by whole numbers, supported by materials and diagrams

- thousandths and relate them to tenths, hundredths, and decimal equivalents
- round decimals
 with two decimal
 places to the
 nearest whole
 number and to one
 decimal place
- read, write, order, and compare numbers with up to three decimal places
- solve problems involving number up to three decimal places
- recognise the per cent symbol (%) and understand that per cent relates to 'number of parts per hundred', and write percentages as a fraction with denominator 100, and as a decimal

- know angles are measured in degrees: estimate and compare acute, obtuse, and reflex angles
- draw given angles, and measure them in degrees (o)
- identify:
 - angles at a point and one whole turn (total 360o)
 - angles at a point on a straight line and 2 I a turn (total 1800)
 - other multiples of 90o
- use the properties of rectangles to deduce related facts and find missing lengths and angles
- distinguish between regular and irregular polygons based on reasoning

- and meter; centimeter and millimeter; gram and kilogram; liter and milliliter)
- understand and use approximate equivalences between metric units and common imperial units such as inches, pounds, and pints
- estimate volume
 [for example, using I cm3 blocks to build cuboids
 (including cubes)]
 and capacity [for example, using water]
- solve problems involving converting between units of time
- use all four operations to solve problems involving measure [for example, length,

"The poetry of logical ideas"

Number: Addition and subtraction

- add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction)
- add and subtract numbers mentally with increasingly large numbers
- use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy
- solve addition and subtraction multistep problems in contexts, deciding which operations and methods to use and why.

- interpret remainders appropriately for the context
- multiply and divide whole numbers and those involving decimals by 10, 100 and 1000
- recognise and use square numbers and cube numbers, and the notation for squared (2) and cubed (3)
- solve problems involving multiplication and division including using their knowledge of factors and multiples, squares, and cubes
- solve problems involving addition, subtraction, multiplication and division and a combination of these, including

 equivalents of 2 I, 4 I, 5 I, 5 2, 5 4 and those fractions with a denominator of a multiple of 10 or 25.

Number: Addition, Subtraction, Division and Multiplication

- multiply multi-digit numbers up to 4 digits by a two-digit whole number using the formal written method of long multiplication
- divide numbers up to 4 digits by a two-digit whole number using the formal written method of long division, and interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context

- the answer in its simplest form [for example, 4 I × 2 I = 8 I]
- divide proper fractions by whole numbers [for example, 3 | ÷ 2 = 6 |]
- associate a fraction with division and calculate decimal fraction equivalents [for example, 0.375] for a simple fraction [for example, 8 3]

Key Vocabulary

 From OJS key vocabulary for subject.

Wider Offer

Complete Maths Tutor, TTRS, Numbots, Sport Numeracy, preteaching, weekly TTRS winners, Achievement

- solve problems which require answers to be rounded to specified degrees of accuracy
- recall and use
 equivalences
 between simple
 fractions, decimals,
 and percentages,
 including in
 different contexts.

Number: Ratio

solve problems
 involving the
 relative sizes of
 two quantities
 where missing
 values can be found
 by using integer
 multiplication and
 division facts

Number: Percentages

 solve problems involving the calculation of percentages [for calculation and conversion of units of measure, using decimal notation up to three decimal places where appropriate

use, read, write, and convert between standard units, converting measurements of length, mass, volume, and time from a smaller unit of measure to a larger unit, and vice versa, using decimal notation to up to three decimal places convert between miles and kilometers

Measurement: Perimeter, area, and volume

 recognise that shapes with the same areas can have different diameter and circumference and know that the diameter is twice the radius recognise angles where they meet at a point, are on a straight line, or are vertically opposite, and find missing angles.

Geometry: Position and Direction

- describe positions on the full coordinate grid (all four quadrants)
- draw and translate simple shapes on the coordinate plane and reflect them in the axes.

Year 6 Mock SATs in Hall.

Measures: Statistics

- solve problems which require answers to be rounded to specified degrees of accuracy
- recall and use
 equivalences
 between simple
 fractions, decimals,
 and percentages,
 including in
 different contexts.
- solve problems involving the calculation and conversion of units of measure, using decimal notation up to three decimal places where appropriate

Key Vocabulary
